Programmable automatic disposable biopsy system designed to cover a wide range of soft tissue core biopsy procedures

FEATURES

- Dual firing mode:
  D Delay firing mode to visualize needle stylet sample notch placement within a lesion before activating the cutting cannula
  A Automatic firing mode release the stylet and cannula in rapid sequence capturing specimen by pushing a single button
- Powerful spring firing mechanism obtains optimal quality biopsy sample
- One-hand use leaves the physician able to operate the ultrasound probe
- Lightweight, compact design makes the system ideal for CT-guided procedures as well as performing multiple biopsy procedures at the same site with minimal trauma

Easy to manipulate

A Automatic mode trigger
D Delay mode trigger

Stylet positioning

Quality sampling capability
